

## **CIT GmbH organised the 2<sup>nd</sup> meeting of the *EntreComp Framework Implementation Project*.**

The CIT GmbH led the 2<sup>nd</sup> virtual meeting of the EntreComp Implementation (ECI) Project, which took place on 29<sup>th</sup> April 2020. Due to the Covid-19 pandemic, the Consortium was not able to meet on-site in Greece as scheduled and decided to conduct the meeting virtually demonstrating great resilience and high commitment to project's activities and their implementation.

During the online meeting Partners discussed about the current project progress and stated that the activities are perfectly aligned to the initial schedule. In particular, partners discussed about the finalisation of the report for stocktaking on the dynamics of entrepreneurial competencies at European level: the report will capture the state of implementation of the EntreComp Competence Framework for entrepreneurial skills which develop implementation tools and training content for the European VET systems.

As project coordinator, CIT GmbH prepares the summary of all national reports and, as a result, develops, in close cooperation with all project partners, a model for the implementation of the EntreComp Framework for the integration of entrepreneurial skills into the European education system.

The meeting also allowed the partners to plan the definition of the training contents that will be developed in the next months of implementation.

ECI is a project co-financed by the Erasmus Plus Programme and implemented by 8 Partners from 6 countries, i.e. Belgium, Greece, Italy, Germany, Romania and Poland. The project aims to improve the understanding of the word "entrepreneurial" in order to tackle economic and social challenges.

Although widely endorsed, the "EntreComp Framework" has not yet been adopted at systemic level in the field of VET nor tested in real settings. The Project EntreComp Implementation has the objective of "operationalizing" the "EntreComp Framework" by developing implementation tools and training content for the European VET system to adopt "EntreComp" in operational environments and ignite entrepreneurship.

Needs and target groups to be addressed: ECI has selected 6 competencies along the three areas of the "EntreComp Framework" as following to work on:

1.2 Creativity: Develop creative and purposeful ideas

1.5 Ethical and sustainable thinking: Assess the consequences & impact of ideas, opportunities and actions

2.1 Self-awareness and self-efficacy: Believe in yourself and keep developing

2.5 Mobilizing others: Inspire, enthuse and get others on board

3.1 Taking the initiative: Go for it

3.3 Coping with uncertainty, ambiguity & risk: Make decisions dealing with uncertainty, ambiguity and risk
